

| Swish Capabilities Brief

Vision, Velocity, Value

Background

Swish is a Service-Disabled Veteran-Owned and HUBZone certified Small Business provider of technology solutions and engineering services to the U.S. Federal Government with a focus on high-quality outcomes for our clients. Our experienced and certified engineers research and evaluate the most innovative technologies, and then develop full life cycle solution offerings to ensure our clients realize maximum operational value. Swish ensures your digital service capabilities, performance and security exceed your expectations and requirements.

We are adept at providing solutions and services that enable our customers to successfully navigate the complex life cycle of an IT implementation. Swish designs solutions and services with high-velocity operations and continuous improvement as foundational characteristics. We base this on the generative continuous improvement practice of Theory of Constraints Lean Six Sigma (TLS), which is proven to deliver 4 to 20 times higher business performance than traditional operational approaches.

Practice Areas

Swish specializes in four practice areas:

- ▶ **Cybersecurity**
- ▶ **IT Modernization**
- ▶ **Managed Services**
- ▶ **Performance Engineering**

Swish provides product resale, consulting services and managed services in each practice area. We help you overcome “tool sprawl,” by being a trusted adviser from planning through execution. Federal government organizations have relied on Swish as a trusted advisor for over a decade. Our objective is to enable highly effective and efficient operations that greatly increase mission velocity while reducing risk.

IT Modernization

Delivering citizen services, mission success, and greater IT efficiencies requires that federal agencies leverage modern digital capabilities. This premise lies at the heart of the government’s Cloud Smart, Data Center Optimization Initiative (DCOI), Federal Information Technology Acquisition Reform Act (FITARA), and other digital government initiatives. Swish provides expert-level engineering and operations for data center and cloud operations. Our key capabilities include:

- Backup, Disaster Recovery and COOP
- Cloud Migration and Operations
- Data Center Modernization
- DevSecOps
- Tiered Enterprise Storage
- Virtualization and Orchestration

We recommend clients begin with our IT Modernization Workshop and join our NOVA DevSecOps Meetup by registering at:

<https://www.meetup.com/DevSecOps-NoVA/>

Performance Engineering

Swish’s solutions and services focus on delivering optimal end-to-end performance so your workforce is as productive as possible, while optimizing infrastructure cost. These solutions directly contribute to meeting agency performance goals. Our key capabilities in this area include:

- ADC, SD-WAN and WAN Optimization
- Application Performance Management
- Automation
- End User Experience Analysis
- IT Service Monitoring
- Site Reliability Engineering (SRE)
- Network Performance Management

We recommend clients begin with our Performance Matters Workshop and join our DC Site Reliability Engineer (SRE) Meetup by registering at:

<https://www.meetup.com/SRE-DC/>

Cybersecurity

Swish changes the game and protects your assets with best-of-breed cybersecurity solutions and advanced forensic and behavioral analytics in the identification of hackers and insider threats. Our cyber solutions provide in-depth assessment and requirements formulation; planning and engineering design; seamless transition and comprehensive training with continual operations evaluation and enhancement. Our key capabilities include:

- Cloud Access Security Broker
- Cloud Security
- Governance, Regulation and Compliance
- Insider Threat Analysis
- Security Incident and Event Management
- Shadow IT Policy Enforcement
- SOC Automation

We recommend clients begin with our Shadow IT and Cloud Services Assessment.

Managed Services

Swish Managed Services help you maximize your value and results. Allowing you to focus on your core responsibilities, our experts apply our proven best practices to ensure operations run smoothly. This includes initial design, deployment, training, acquisition planning, management and continuous improvement of the solution. Our goal is to be a trusted partner and team member to help you achieve your mission goals.

Pathways to Procurement

Swish has a wide variety of contracts available for procurement of products, solutions, and services:

- CIO-CS (prime) HHSN316201500049W
- First Source II (subcontractor)
- GSA Schedule 70 (prime) GS-35F-0563
- ITES-3H (subcontractor)
- NETCENTS-2 (subcontractor)
- NITAAC CIO-CS (prime)
- SEWP V (prime) NNG15SC91B

Partners

Swish rigorously analyzes and selects innovative technology providers in each of our practice areas. Below is a partial list of key technology partners.

- Aternity
- BeyondTrust
- Catalogic
- Checkmarx
- Check Point
- CommVault
- Corelight
- Dynatrace
- Elastic
- F5
- Gigamon
- HPE
- Ixia
- MAD Security
- NetApp
- Nutanix
- PaloAlto
- Qlik
- Red Hat
- Riverbed
- Splunk
- Varonis
- Veeam
- Venafi
- VMWare
